High Performance Processor

Smart IC processor to reduce energy consumption
Better endurance ability and longer battery life

4-6
Months

No Ozone Generator
4-6 months battery life

3-4
Months

With Ozone Generator (once every 2 days)
3-4 months battery life

4 Lighting Modes

Aqua Lighting-Power Mode

Turn on the switch to open sensor light belt,
4 lighting modes for 4 working status,
Shining aqua light for power on status

● - Power Switch

4 Lighting Modes

Red Lighting Sterilization Mode

Long pressing the ozone generator for 3 seconds,
The lid will close and start sterilization.
The sterilization process will last for 20 minutes.

*Keep Ventilation When Ozone Sterilization Starts

4 Lighting Modes

Blue Lighting Working Mode

The blue light shines for 5 seconds before
the lid close automatically.

4 Lighting Modes Green Lighting Standing Lid Mode

For long session use, put your hand over sensor area for 3 seconds to open/close standing lid mode.
The green light shines for 3 times to switch to working mode.

STEP

User Manual

NO inner bucket

Step 1. Remove the LID

Step 2. Install the battery

Step 3. Fix the trash bag to plastic ring

Step 4. Put the ring and trash bag to the bin

Step 5. Put the lid back to bin

STEP

User Manual

w. inner bucket

Step 1. Remove the LID

Step 2. Install the battery

Step 3. Fix the trash bag to plastic inner bucket

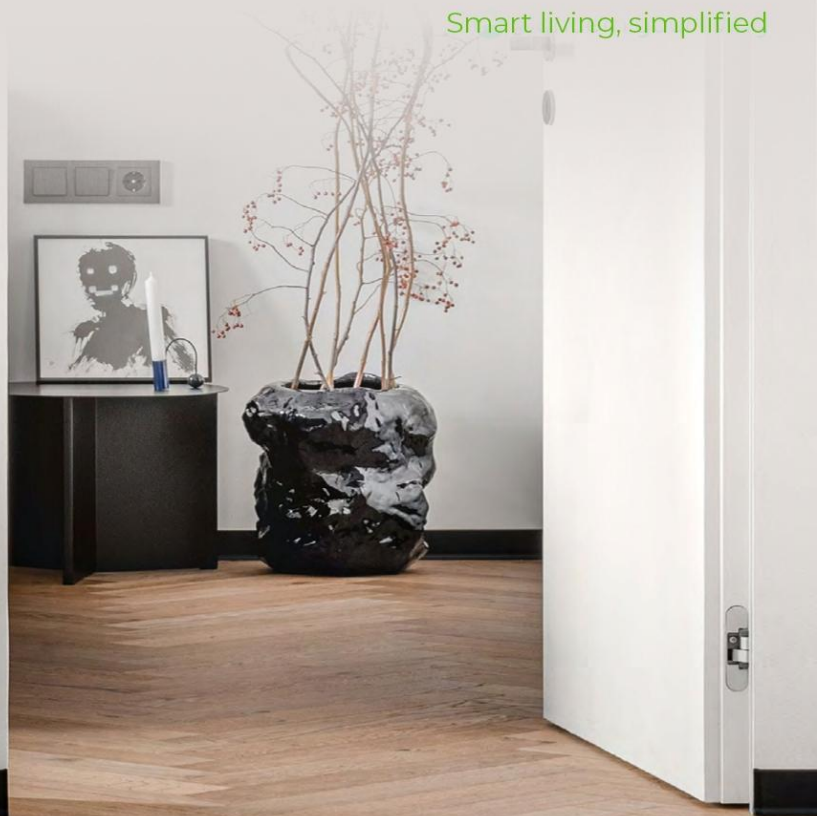

Step 4. Put the inner bucket into the bin

Step 5. Put the lid back to bin
